EXPERIENCE

Associate Data Engineer – BI&A Leadership Development Program Feb 2025 – Present
Travelers Insurance – St. Paul, MN

- Designed and deployed a RAG-based internal support chatbot (Databricks Agent Framework, Vector Search, Streamlit) answering infrastructure/access questions from a live knowledge base for 300+ analytics users.
- Developed Databricks governance pipelines (Jobs, Unity Catalog, Snowflake) that inventory compute resources and enforce cost/ownership policy across hundreds of analytics users.
- Built cross-account serverless AWS automations (Lambda, EventBridge, SNS, Snowflake) monitoring cloud compute health, reclaiming idle resources, and enforcing best practices across 12 AWS accounts saving tens of thousands of dollars yearly and improving cloud hygiene.

Business Intelligence Intern Summer 2024
Travelers Insurance – St. Paul, MN

- Built automated model monitoring infrastructure for a production predictive model using Snowflake, SQL, AWS, and Python used by hundreds of internal attorneys, detecting and preventing model failures.

Teaching Assistant – Computer Systems & Linear Algebra Fall 2023 – Spring 2024
University of Minnesota – Twin Cities

- Led weekly lab sections for 40+ students in Intro to Computer Systems, teaching C and assembly-level computation.
- Taught Linear Algebra discussion of 40 students teaching Linear Algebra fundamentals and NumPy-based linear algebra and visualization.

PROJECTS & ACHIEVEMENTS

St. Paul Living Quality Map Fall 2026

- Choosing where to live means weighing safety, affordability, and opportunity against each other — but that data is public and scattered across a dozen sources, not compared side by side.
- Solved this with a Python pipeline unifying data from St. Paul, Minneapolis, OpenStreetMap, Census, MnDOT, and CDC into a weighted Health Score per district, displayed via a Next.js map with address search and historical trend charts, so anyone can compare neighborhoods by what matters most to them.

EDUCATION

Georgia Institute of Technology Fall 2026 – Fall 2028 (expected)
M.S. in Analytics, Computational Data Analytics

University of Minnesota – Twin Cities Fall 2021 – Fall 2024
B.S. in Data Science, GPA: 3.7

Relevant coursework: Machine Learning, Databases, Algorithms, Statistics, Linear Algebra.

TECHNICAL SKILLS

Languages: Python, SQL

Data & ML: PySpark, Pandas, NumPy, RAG / Vector Search, Databricks Agent Framework

Platforms: Databricks (Unity Catalog, Jobs, Apps), Snowflake, AWS (S3, IAM, Lambda, EventBridge, SNS, Secrets Manager)

Tooling: Git/GitHub, Linux
